INOAC Packaging Group Opens New Plant in Mexico

(Bardstown, KY—February 2008) – Inoac Packaging Group is pleased to announce the completion of a new manufacturing plant in Monterrey, Mexico. The 110,000 square foot facility features six automated spray lines, a clean-room environment, and in the very near future will add vacuum metalizing capabilities. The new plant, which is equipped to decorate all of Inoac’s molded items, held a grand opening in October of 2007. A full line of custom decorating services is also offered including spray frosting, hot stamping and silk screening.

INOAC Packaging Group is an international manufacturer with plants in the United States, Mexico, Japan, and China. INOAC uses a highly refined stretch blow process and PET plastic to create custom containers for some of the most well-known and respected cosmetic companies in the world. INOAC creates innovative packages by combining the aesthetics of shape and color with the practicality of state-of-the-art technology and manufacturing. Inoac Packaging Group is part of the global INOAC Corporation.
